

RobecoSAM Sustainable Water Equities F EUR

RobecoSAM Sustainable Water Equities is an actively managed fund that invests globally in companies offering products and services across the water value chain. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund's objective is also to achieve a better return than the index.

Performance

Indexed value (until 30-04-2023) - Source: Robeco

Performance

Based on transaction prices, the fund's return was -1.62%.

In the water sector, we have seen relatively good quarterly earnings from industrials and the outlook often was good as well. The updates from residential building-related companies like plumbing were quite good and shares in this sector rebounded in general. There were some fears that commercial construction-related building material stocks will announce weaker outlooks, though the updates we have seen so far were still solid. Analytics still suffer under de-stocking in the value chain after companies increased their stocks during Covid times. Long-term, the outlook in the analytics sector is still very strong and offers a lot of growth opportunities, and valuations are relatively attractive, which is why we still keep our exposure to the sector.

Market development

The earnings season started in April. As always, the quarterly numbers and outlook had quite an impact on the prices of equities and sectors. Lots of industrials actually released better numbers than expected. Though some of the companies were rather cautious in their outlook. There is still a debate about the macroeconomic cycle, inflation and level of interest rates going on.

Expectation of fund manager

The fund is still overweight in suppliers of analytical equipment thanks to their good growth opportunities. Building materials are still overweight as well. We prefer either infrastructure-related building materials or residential names with a rather high repair and renovation exposure. The fund has a small weight in US water utilities only. Brazilian water utilities are not held at the moment.

Top 10 largest positions

The top ten positions are usually between 30-40% of the net asset value. The fund has a high exposure to water analytics, with four of the top ten holdings coming from this sub-cluster: Avantor, Thermo Fisher Scientific, Danaher and Agilent Technologies.

Fund price

30-04-23	EUR	325.77

Changes

This share class shows performance information prior to its launch date. On the launch date of this share class, the fund absorbed Multipartner SICAV - RobecoSAM Sustainable Water Fund. Performance prior to the launch date has been simulated on the basis of the past performance of the absorbed fund that had similar investment policy and applied higher or comparable charges.

Sustainability

The fund's sustainable investment objective is to help mitigate the global challenges related to scarcity, quality, and allocation of water. Water and sustainability considerations are incorporated in the investment process by the means of a target universe definition, exclusions, ESG integration, and voting. The fund only invests in companies that have a significant thematic fit as per Robeco's thematic universe methodology. Through screening on both Robeco's internally developed SDG Framework and Robeco's exclusion policy, the fund does not invest in issuers that have a negative impact on the SDGs, are in breach of international norms or where products have been deemed controversial. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. The integration of ESG factors in the investment analysis does not have a sustainability indicator. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework, which utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs, provides a methodology for assigning companies with an SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. If the data set does not cover the full portfolio, the figures shown above each impact level sum to the coverage level to reflect the data coverage of the portfolio, with minimal deviations that reflect rounding. Weights < 0.5% will show as 0. If an index has been selected, the same figures are also provided for the index.

Investment policy

RobecoSAM Sustainable Water Equities is an actively managed fund that invests globally in companies offering products and services across the water value chain. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund contributes to water infrastructure and to distribution of tap water, and collection and treatment of wastewater and focuses on companies which supply to the value chain of water or which offer products or technologies which are more water efficient than others in their category. This is done by investing in companies that advance the following UN Sustainable Development Goals (UN SDGs): Good health and well-being, Clean water and sanitation, Industry, innovation and infrastructure, Sustainable cities and communities, Responsible consumption and production, Life below water and Life on land. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and proxy voting. The fund also aims to achieve a better return than the index. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. Benchmark: MSCI World Index TRN. The majority of stocks selected will be components of the benchmark, but stocks outside the benchmark may be selected too. While the investment policy is not constrained by a benchmark, the fund may use one for comparison purposes. The fund can deviate substantially from the issuer, country and sector weightings of the benchmark. There are no restrictions on the deviation from the benchmark. The benchmark is a broad market-weighted index that is not consistent with the sustainable objective of the fund.

Fund manager's CV

Dieter Küffer is the Head of the Thematic Investing team covering Water/Healthy Living/Biodiversity/Circular Economy. He has been Portfolio Manager for the RobecoSAM Sustainable Water Equities strategy since inception of the strategy in 2001, the year he joined Robeco. In the past, he has also managed several other thematic strategies at Robeco. Prior to joining, he led a team responsible for the management of actively managed equity mandates on behalf of Swiss institutional clients at UBS Asset Management in Zurich. He began his career as an investment counsel in the Private Banking Division of UBS in 1986. Dieter Küffer holds a federal diploma as a Swiss-Certified Banking Expert and is a CFA® charterholder. Amy Wanner-Thavornsuk is Co-Portfolio Manager of RobecoSAM Sustainable Water Equities strategy and also covering thematic research within the Thematic Investing Water/Healthy Living/Circular Economy/Biodiversity team. Prior to joining in 2019, she worked for 9 years at JPMorgan Assets Management in London, whereof 6.5 years in the same role covering emerging market equities. She has been in the Financial Industry for almost 15 years with previous work experience in investment banking and consulting. She started her career as an auditor at PWC in Bangkok back in 2003. Amy holds an BS in Finance & Accounting from the Chulalongkorn University in Thailand and an MBA from the CASS Business School, UK. She is a CFA® Charterholder.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
