## ESG Transparency

This page provides transparency on key sustainability metrics that may be of interest to investors but are not part of the fund's investment process. The following metrics inform investors more broadly on their exposure to selected ESG topics.

### MSCI ESG Scores

Holding-weighted average (0-10)

### External fund ratings

As of 31.03.2022

### Weighted average carbon intensity

(tCO<sub>2</sub> equivalents per USD million in sales)<sup>1</sup>

<sup>1</sup> The fund maintains a lower weighted average carbon intensity profile than the benchmark and/or a low absolute profile (defined as below 100Mt of CO<sub>2</sub> emissions per million dollars of revenue)

### Carbon footprint

(tCO<sub>2</sub> per USD million invested)

**MSCI ESG scores** are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown a breakdown of the E, S and G scores, in reference to the different components that are considered for the Environmental, Social and Governance pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

**UN Sustainable Development Goals (UN SDGs):** The 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries - developed and developing - in a global partnership. We aggregate the 17 UN SDGs into 5 topics: Responsible products; Healthcare and well-being; Climate solutions; Water solutions; Recycling and waste management. These 5 topics are measured and shown based on their revenue exposure to Sustainable Impact Solutions reflecting the extent to which company revenue is exposed to

products and services that help solve the world's major social and environmental challenges.

\*\*MSCI ESG Research LLC's ("MSCI ESG") fund metrics and ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 56,000 multi-asset class Mutual funds and ETFs globally (as of January 17, 2022). risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. This metrics is applicable across asset classes, including fixed income, as it's not based on equity ownership basis. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research

**Carbon Footprint (tons CO<sub>2</sub>e / USDm invested):** Expresses the greenhouse gas footprint of an investment sum. The carbon emissions scope 1 and 2 are allocated to investors based on an enterprise value ownership approach and normalized by the current portfolio value. ## Use of derivatives / fund of fund investments

Derivatives and fund of fund investments used in the portfolio are treated on a lookthrough basis, whereby the economic exposures to the underlying basket of securities is treated as an actual investment in the individual securities that make up this basket. This might in the case of broad market derivatives or fund of fund investments lead to minimal exposures to securities that are excluded from direct investments.

## Aggregation of ESG/Carbon data

ESG scores of holdings in the portfolio and the reference index are aggregated using their respective individual weights and ESG scores (sum product).
